1. Write a Java Program to convert a given string into lowercase.
2. Write a Java Program to convert a given string into uppercase.
3. Write a Java Program to count the number of vowels, consonants, numbers, and special characters.
4. Write a Java Program to count the number of spaces in a given string.
5. Write a Java Program to convert even index characters to uppercase and odd index characters to lowercase.
6. Write a Java Program to remove spaces from a string.
7. Write a Java Program to remove the first and last character from a string.
8. Write a Java Program to remove vowels from a given string.
9. Write a Java Program to remove starting and ending spaces from a given string.
10. Write a Java Program to convert each letter of every word in uppercase.
11. Write a Java Program to reverse a string.
12. Write a Java Program to check if a string is palindrome.
13. Write a Java Program to count the number of words present in a given sentence.
14. Write a Java Program to remove a specific character from a string (remove all occurrences).
15. Write a Java Program to remove the first occurrence of a specified character from a string.
16. Write a Java Program to replace a given character with another specified character.
17. Write a Java Program to add a specified character at the given index.
18. Write a Java Program to reverse each word in a given string.
19. Write a Java Program to check if two strings are equal using different ways in Java.
20. Write a Java Program to remove duplicate characters from a given string.
21. Write a Java Program to print duplicate words in a given string.
22. Write a Java Program to check if two strings are anagrams.
23. Write a Java Program to check if a string is a pangram.
24. Write a Java Program to remove odd index characters from a string.
25. Write a Java Program to remove a substring from a string.
    a. Example: Input: `hello`, toRemove: `he` → Output: `llo`
26. Write a Java Program to remove a substring from a string (variant 2).
    a. Example: Input: `hello`, toRemove: `eh` → Output: `llo`
27. Write a Java Program to print the longest and smallest word in a given string (sentence) based on length.
28. Substring Search
29. Longest Palindromic Substring

LeetCode:

1. Reverse String (LeetCode 344)
2. Reverse Words in a String III (LeetCode 557)
3. Valid Palindrome (LeetCode 125)
4. Length of Last Word (LeetCode 58)
5. Valid Anagram (LeetCode 242)
6. Group Anagrams (LeetCode 49)
7. Find All Anagrams in a String (LeetCode 438)
8. Longest Substring Without Repeating Characters (LeetCode 3)
9. Minimum Window Substring (LeetCode 76)
10. Permutation in String (LeetCode 567)
11. Valid Palindrome (LC 125)
12. Longest Palindromic Substring (LC 5)
13. Longest Common Prefix (LC 14)
14. Repeated Substring Pattern (LC 459)
15. String Compression (LeetCode 443)
16. Character Counting & Hashing. First Unique Character in a String (LeetCode 387)
17. Ransom Note (LeetCode 383)
